

Press release.

Cassa Dottori Commercialisti set up a collaboration with CBE to create a bond between the Category and the EU opportunities.

Rome, 9th December 2024

The aim of the signed agreement between Cassa Dottori Commercialisti and CBE, a company that develops information services and offers support to take part in European tenders, is to smoothen access and guidance to European projects for the professional growth of the category.

A collaboration that enables Dottori Commercialisti to broaden knowledge and access to the European funding programs through an agreement that provides the disclosure of “The EU Opportunities” newsletter (a journal focused on European fundings) and the range of services (at discounted rates) to support the attendance to EU direct management fundings and to promote the implementation of EU planning activities.

This agreement falls within the program of fundings provided by the Institution and will allow members to have on hand a tool to increase the opportunities of professional growth.

Not only is it a valid support for members, but the partnership also represents for CDC a strategic tool that make it easier to dialogue directly with stakeholders through the creation of the “Building European Network”, that enhances networking with EU organizations in the social security sector.

“We are pleased with the new convention provided to our members. It is a professional tool that Italian companies can use to learn about European tenders to simplify the access to the Community fundings” declared Ferdinando Boccia, Chairman of the CDC.

“This collaboration is a support to members and their professional growth, in a multidisciplinary and international perspective of the profession. In the current context it is important that our category could have the chance to investigate issues such as facilitated finance and access to Community tenders, since companies more and more frequently need to have alongside an interlocutor who is capable to support them in the application and the managing of EU projects”.

“I am pleased and honoured to have signed this agreement, that enables us to supply innovative services on EU issues and projects to the CDC and its members”, added Mr. Mario Erba, President of Coopération Bancaire pour l’Europe. *“I believe that Dottori Commercialisti are such important players in the achievement of a synergy between the Italian business community and the European financial sphere. CBE, whereof Banca Popolare di Sondrio is a majority partner, is a European Group of Economic Interest founded in Belgium in 1992 with the aim of developing information services and EU funding consulting. In Brussels, a Euro-developer qualified team offers customised services to attend EU tenders and to applicate for Community fundings through the products Check-upEuropa and EasyEuropa. In addition to them, GarEuropa product concerning the reporting and the analysis of European and International calls for tenders, and MeetEuropa product, regarding the activity of information, training, domiciliation and arrangement of events”.*
